

EMERALD WHO'S WHO
IN
ASIA

PREFACE

In today's world, men and women from Asia have consistently projected themselves to be as good, and in many cases, even better performers than their counterparts from the developed world in different fields of human endeavour.

'Emerald Who's Who in Asia' is a compilation of short biographical profiles of individuals who have done their country and continent proud with their exceptional skills and abilities along with that of many other promising Asians exhibiting rare talent and the desire to achieve the pinnacles of glory and great performance, some unobtrusively and some not so reticently.

'Emerald Who's Who in Asia' is a revelation about the human jewels in Asia's crown. We have worked hard at this new venture and would feel highly satisfied if it receives the same welcome from the reading public as the many other titles in the same genre published by us over the last few decades.

All the biographies in this 1st edition of the title are based on information personally obtained from each biography through questionnaires and other sources like telephonic conversations and e-mails. The collected information was then given due shape based on our editorial policy, format and style. These were later authenticated by the persons included here with signatures obtained on galley proofs sent to them for final verification.

This maiden edition of the 'Emerald Who's Who in Asia' contains about 504 capsule profiles.

August 30, 2014
